

Tasa Construction Quarterly Newsletter

SPRING 2010

VOLUME # 1 ISSUE #2

New Office

After 28 years of business Tasa Construction has finally moved out of the home. With the business moving out and the last of John's five paternal children moving out in May. Only John's six year old adopted daughter is left in the house, John and Maureen have nearly become empty nesters.

If you are ever in the area please stop by for a visit. Tasa's new office is located at suite #105-8557 Government Street, Burnaby. We are right beside Costco. Tasa's phone number remains 604-522-8212.

Restoration Work

Did you know that if the unthinkable happens and you have a fire, flood or other disaster that damages your house, you are not required to hire a restoration company to do the repair work? You may hire a construction company to do the work. Restoration companies are great at securing your house after a disaster and dealing with your possessions. Let a construction company you know and trust do the building reconstruction.

Green Newsletter

In our continued effort to keep this beautiful planet green, we would like to make the quarterly newsletter a paperless one. As many of our customers date back before the wide use of email we do not have your email addresses on file. If you would like support our green initiative please send your email address to shane@tasaconstruction.com, with green newsletter in the subject line.

Everyone who emails in will be entered into a draw for a complimentary home maintenance check-up (a \$149.95 value) plus a \$50 gift certificate to Rona.

"Your universe expands or contracts according to your courage."

Spring Tips

1. Makes sure your outdoor vents for exhaust fans, heat recovery ventilators, clothes dryers, furnaces and hot water tanks are clear of debris. Check that dampers operate freely and close properly
2. Check roof and gutters for any damage caused by snow or falling branches due to storms
3. Check smoke, carbon monoxide and security alarms. Replace batteries if required. Please note that the building code now requires both smoke and carbon monoxide detectors to be hardwired & interconnected.
4. Check all the fascia and trim board. These areas can become weathered and worn and may lead to water damage to your house
5. Spring cleaning; store all winter clothing/accessories, clean windows, remove clutter and organize.

Home Maintenance Check-up

Tasa has begun a new service called Home Maintenance Check-up. Similar to an annual check-up performed by a doctor on you, the maintenance service review's the health of your house. Our trained carpenters will perform a 50 point inspection on your home and we will present a report based on their findings. Most people bring in their car for an annual inspection so why not your house, which represents a much larger investment? For an introductory price of \$149.95, we will ensure that your house is healthy, safe and well maintained. Please call 604-522-8212 for more details.

Referral Program

Know anyone who is thinking about doing some work at their home? If so we would love to talk to them. In appreciation for any referrals that result in a signed contract you will receive a nice gift. It is our way of saying "THANKS."
